## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a method of screening a compound, using SEQ ID No. 2 and SEQ ID No. 4.

Group II, claim(s) 9-12, drawn to a kit for screening using SEQ ID No. 2 and SEQ ID No. 4.

Group III, claim(s) 18-20, drawn to a monoclonal antibody against SEQ ID No. 4.

Group IV, claim(s) 21-24, drawn to a polypeptide against SEQ ID No. 4.

Group V, claim(s) 25-27, drawn to a transgenic animal having SEQ ID No. 10.

Group VI, claim(s) 13-17, 28-33, drawn to compound affect Rap1-p30.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

With respect to Group VI, Haga et al. (US 5492908) teach a list of compound where 2 of the compounds are identical to the recited ones, namely N-(2-methylsulfonylamino-5-trifluoromethyl-3-pyridyl)-4-fluorobenzamide and N-(2-methylsulfonylamino-5-trifluoromethyl-3-pyridyl)cyclohexanecarboxamide (Col. 10, Example 2; Example 4).

With respect to Group III and IV, Walker et al. (WO 00/29574) teach an antibody (also is a polypeptide) against SEQ ID No. 4 (See SEQ ID No. 16, match 99.8%, only one mismatch; See claim 8).

Since applicants' invention do not contribute a special technical feature when viewed over prior art of Walker et al. and Haga et al., Groups I-VI do not have a single general inventive concept and so lack of unity of invention is deemed proper.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Cheu whose telephone number is 571-272-0814. The examiner can normally be reached on 9:00-5:00.
